

CATMINT BOOKS is a rapidly growing company that
has carved a niche for itself in the
licensing & copyright industry.

We specialize in creating a wide range of
high-quality, illustrated books for children,
designed to inspire and engage young minds.

At Catmint, we are committed to providing comprehensive publishing solutions that contribute to a better reading and learning experience for children around the world. Our editorial and design teams work collaboratively to produce books that are not only visually captivating but also factually rich and attention-grabbing.

We continually strive to improve our services to ensure that our customers receive the best possible experience. Our dedication to excellence makes us the ideal partner for your publishing needs.

OUR GLOBAL PRESENCE..

“We began operations in New Delhi and Prayagraj, India, around 10 years ago. Today, we have reached almost every continent, with potential **clients across the globe.**”

We are committed to providing client-focused services through the efficient and effective delivery of books and content. As part of our future growth, we are also exploring opportunities to expand our operational base into new regions worldwide.”

What we deliver...

We have a wide variety of Children's Books including

EARLY LEARNING

COLOURING BOOKS

ACTIVITY BOOKS

STICKER BOOKS

BIOGRAPHIES

REFERENCE BOOKS

STORY BOOKS

SHAPE BOOKS

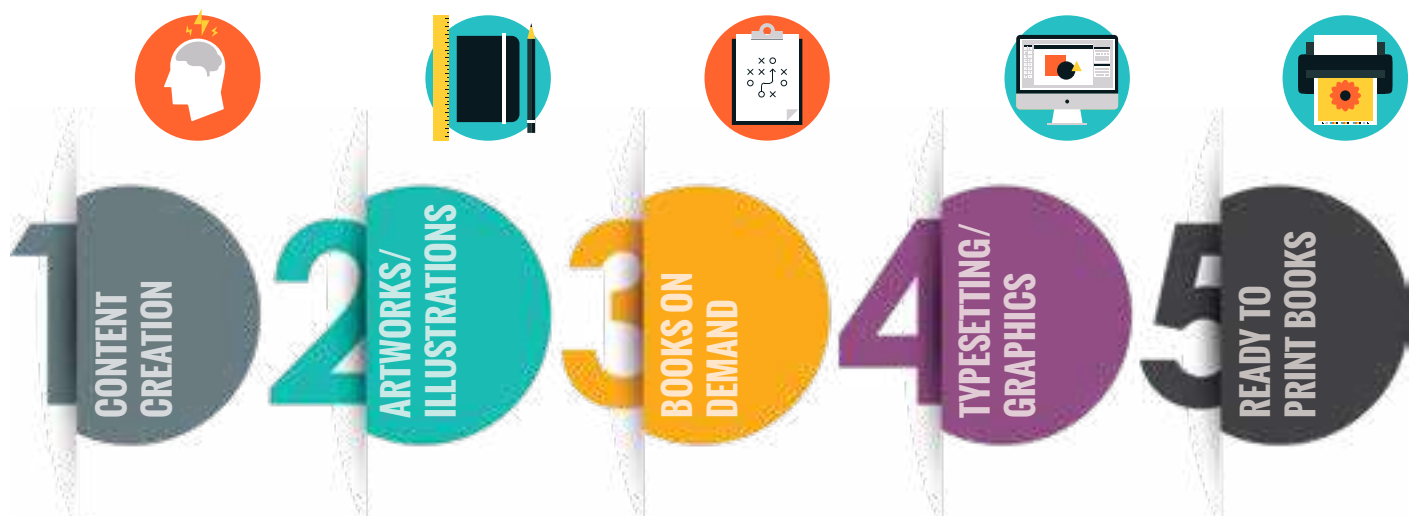

CLASSIC & NOVELS

ENCYCLOPEDIAS

and many more...

OUR SERVICES

CATMINT BOOKS quality originates with its extensive pre-press facilities. While the company has diversified into related areas, pre-press continues to be a focus area with regular investments for upgradation made each year.

ALL RIGHTS ARE EXCLUSIVE TO YOUR MARKET

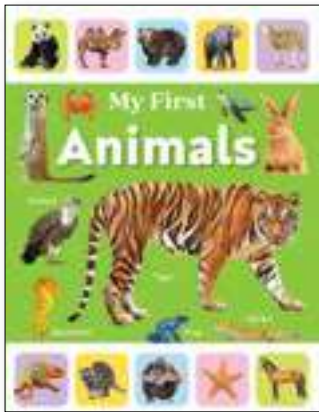

- You can publish/sell/print unlimited copies of the books in your country.
- You can convert the books in any form.
- You can introduce, prepare any other books based on the script/illustrations/ images of the abovesaid books in any form.
- You can make any addition, deletion and alteration in the books and can change the number of pages and adapt content when it is necessary for the market need.
- We provide all open Indesign files for flexible working and editing.

Mechanical Energy

The sum of potential and kinetic energy of an object is called its mechanical energy. It is a form of energy possessed by an object due to its position or motion. Humans and other organisms need **mechanical energy** to move and change its position.

Potential Energy

Potential energy does not do any work, instead it does have the potential to be converted to other energy forms. In the case of mechanical energy, potential energy transforms into kinetic energy when the object is set into motion.

Forms of Potential Energy

Two forms of potential energy are gravitational and elastic potential energy. The energy of an object depending on its height above the ground is called **gravitational potential energy**, while the energy stored in an object that is stretched or compressed, like a spring or ball, to have **elastic potential energy**.

When you kick a ball, you give mechanical energy to the ball to make it move.

The energy gained by an arrow while being stretched by a bow is **elastic potential energy**. When the arrow is released, the potential energy is converted into kinetic energy.

Energy and Engineering

Mechanical Engineering

Mechanical engineering is a branch of engineering which deals with the design, construction, and use of machines. It is one of the oldest and broadest fields of engineering. A mechanical engineer has the knowledge about designing of automobiles, electric fan, aircraft and other heavy vehicles.

What is a Machine?

A machine is a device that comprises the stationary as well as moving parts combined together to generate, transform or utilize the mechanical energy. All the machines are made up of individual elements or parts and units.

Steam engine converts heat energy into mechanical energy using steam as a medium.

Electric motors, such as in ceiling fans, sewing machines, fans, etc., convert electric energy into mechanical energy.

A wind turbine converts the kinetic energy of moving wind into mechanical energy.

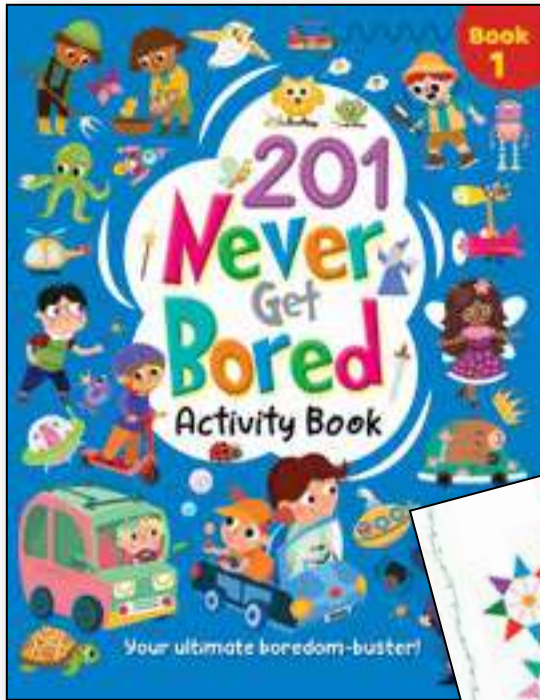

When water falls the blades of the turbine, the mechanical energy of the water is converted into electrical energy.

The water falling down the slope converts gravitational potential energy (due to height) into kinetic energy.

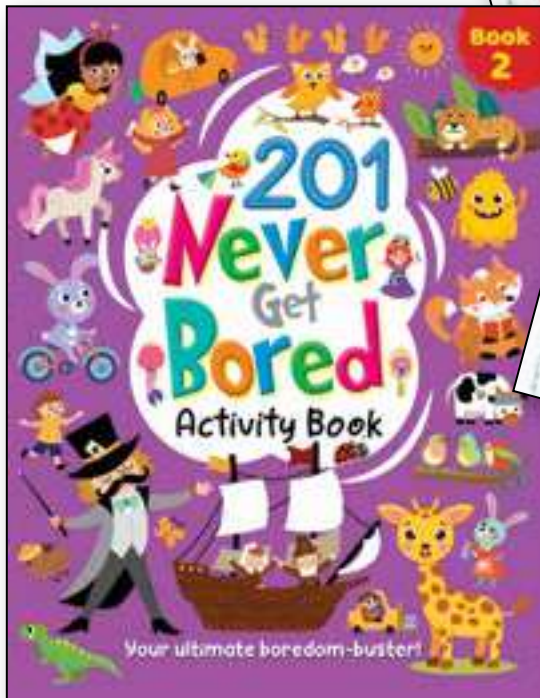

What type of energy does a ball in rest at the top of a ramp have?

Gravitational potential energy

HISTOGRAMS

Read Example

The school committee decided the number of books to be bought for each class. See the histogram below.

How many books will there be all?

Problems

1. A company spent money on the number of different sizes of the building for a building.

How many floors have between 10 and 20 floors?

2. The expenditure of a doctor's office was recorded at each patient's visit time.

How many people visited for 10 treatments?

3. A company manager recorded the customers' visit times.

How many people visited for 10 treatments?

4. An English newspaper recorded the number of people who visited in green clothes.

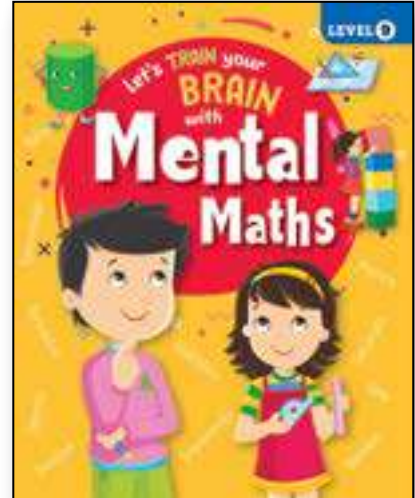

How many people visited between 10 and 20 years?

5. A company manager recorded the customers' visit times.

How many people visited all?

6. The histogram shows the ages of Sofia family members who work in the family office.

How many family members are older than 30 years?

ISBN: 978-93-95981-81-1

SURFACE AREA OF SHAPES

Read Example

Find the surface area of the given shape.

Surface area = 114

Problems

Find the surface area of the given shapes.

1. Cylinder

2. Cone

3. Rectangular prism

4. Sphere

5. Triangular prism

6. Square prism

VOLUME OF SHAPES

Read Example

Find the volume of the given shape.

Volume = 120

Problems

Find the volume of the given shapes.

1. Sphere

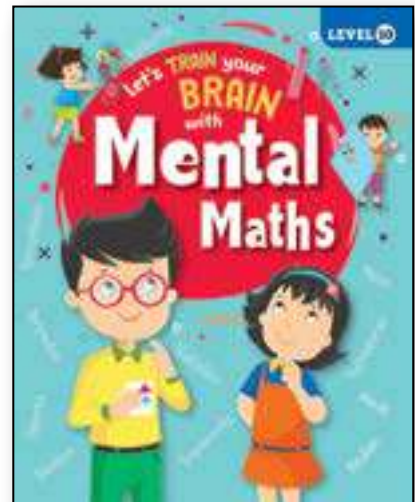

2. Cone

3. Rectangular prism

4. Cylinder

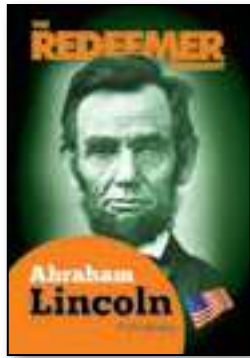

5. Triangular prism

6. Square prism
